CONTACT WERZALIT 17
The Werzalit Rain Screen System is both high quality design and protection.

Werzalit Rain Screen Systems can handle whatever the weather throws at them. With their robust and impact-resistant thermoset / baked on acrylic surfaces, they protect a building structure against the worst weather conditions. Styled to match traditional wood lap siding as well as unique vertical and horizontal profiles, these panels interlock into a precise tongue-and-groove design, complete with a closed cell gasket system to turn away wind, air and water infiltration to a degree unmatched by natural wood or any commodity siding product. The board profiles give you the design freedom, and ensure simple, quick installation.
6” AMERICANA

- Light Pebble Texture
- 6 Inches Of Face Coverage
- 12FT Length Board
- Horizontal Installation
- Abrasion-Resistant Thermo Set (Baked On) Acrylic Surface
- Compressible Gasket System
- Built In- Shiplap Joint
- Available In Any Color
- Environmentally Friendly
6” HERITAGE

- Wood Grain Texture
- 5 7/8 Inches Of Face Coverage
- 12FT Length Board
- Horizontal or Vertical Installation
- Abrasion-Resistant Thermo Set (Baked On) Acrylic Surface
- Compressible Gasket System
- Built In- Shiplap Joint
- Available In Any Color
- Environmentally Friendly
8" AMERICANA

- Light Pebble Texture
- 8 Inches Of Face Coverage
- 12FT Length Board
- Horizontal Installation
- Abrasion-Resistant Thermo Set (Baked On) Acrylic Surface
- Compressible Gasket System
- Built In- Shiplap Joint
- Available In Any Color
- Environmentally Friendly
VENTILATED RAIN SCREEN SYSTEMS
KEY BENEFITS

**Weather Resistance:** WERZALIT Rain Screen System resists weather, moisture and impact damage. It is highly resistant to ultraviolet rays and will not blister, flake or peel. It maintains its original texture, color and structural integrity even after years of being subjected to rain, wind, cold, sunlight and intense heat.

**Moisture Resistance:** The core of the Werzalit Rain Screen System is produced with 24% resin content as well as hard woods and is integrally bonded on both sides with phenolic sheets. WERZALIT is more resistant to changes in temperature and moisture content than any natural wood, hardboard or particle board as well as many other exterior products.

**Damage Resistance:** WERZALIT Rain Screen System Boards will not split, crack or splinter; it is resistant to installation abuse and vandalism. Hail, wind and everyday wear and tear will not dent, chip or nick its hard, rigid impact resistant surface is stronger than cement board.

**Stain / Scuff Resistance:** The abrasion-resistant thermo set (baked on) acrylic surface is easily cleaned and is impervious to acids and alkalines. Stains, scuffs and even graffiti are easily and quickly removed.

VENTILATED RAIN SCREEN SYSTEMS
KEY BENEFITS

Gasket System: WERZALIT’s unique gasket system offers unsurpassed resistance to harsh weather conditions and reduced air infiltration. Overlapping panels fit together with a tongue-and-groove design along with the factory-installed compressible gasket system.

Perfect Joints: No caulking required every panel is produced with a built-shiplap joint to ensure a finished look that reduces unsightly gaps and prevents weather infiltration.

Freedom of design: WERZALIT is available in any color in any quantity with no premium cost.

Environment: CO2 Neutral, Raw materials sourced from sustainable forest lands.

Cost Effective: Low Maintenance, Easy to install.
Werzalit Rain screen Systems can be combined with vinyl or aluminum conventional trims or with Werzalit factory pre-finished trim systems to make a complete exterior package.

**CORNERBOARDS**

Cornerboards are a one piece solution. The result is a stronger corner that unlike the two-piece offerings, give you a sharp 90 degree angle without an exposed seam that picks up dirt.
